

With Autodesk revolutionizing the world of 3D design with AutoCAD, you can see why this is a must-have software for any professional or aspiring architect. If you're going to be making a career with 3D modeling, then it's important to know how to use the features of AutoCAD efficiently and effectively. To begin, you'll need to learn how to navigate the interface and space efficiently. You'll also need to know how different functions in Autodesk work, such as the buttons and menus in Numeric Pad and Drawings Panels. The first chapters of this course deal with basic Autodesk functions and feature manipulation. You will progress through a series of lessons that will teach you all about navigating in AutoCAD, working with tools such as Numeric Pad and Axes Panels, using the various drawing tools such as Fillet, Chamfer, Twist Nine, Taper Joints and etc. You will also learn how to use AutoCAD efficiently by manipulating drawings objects such as Lines, Polylines, Rectangles and more. You will also learn how to use various functions such as Transferring, Rotating, Unioning and Intersectioning drawings objects. If you're only interested in learning a few of these topics, then you can choose "Tutorials" from the chapter menu and select the topic that you want to focus on. This course will cover the following topics: Chapter 1: Getting Started Chapter 2: Navigating in AutoCAD Chapter 3: Creating Basic Objects in AutoCAD Chapter 4: Finishing Objects in AutoCAD Chapter 5: The Transit and the Numeric Pad Panels [TITLE]AutoCAD 2008 All tutorials free download from autodesk official website[TITLE] ¶ <https://web.archive.org/web/20140504001622/http://www.autodesk.com/autocad>

This video tutorial features an introduction to AutoCAD 2008. Additional video tutorials are available for AutoCAD Civil 3D, AutoCAD Electrical, AutoCAD Map 3D, AutoCAD LT. All available free on the Autodesk website.
